AERO Specialties Supplies GSE for the 2010 Olympic Games in Vancouver.

Boise, Idaho, January 27th, 2010. AERO Specialties was selected by all three Vancouver (YVR) FBO's to supply a complete package of ground support equipment (GSE) to meet the aircraft traffic demands of the 2010 Olympiad's athletes, fans and organizers. Avitat, Landmark Aviation & Million Air all began receiving the highest quality equipment in January to complement their current equipment fleets.

Among the 40-some units supplied were Eagle TT series pushback tractors, TLD and JetGo ground power units; as well as a large selection of AERO Specialties towbars, heads, lavatory and potable water carts.

"We are happy to assist our good friends up North, and hope for a successful Olympiad for all the athletes and attendees," stated Matt Sheehan, president of AERO Specialties.

While AERO Specialties regularly provides complete GSE and logistic packages for aviation customers, they also provide packages for events such as, but not limited to, the Presidential Inaugurations, NBAA, CBAA, Sundance Film Festival and numerous sporting events from Super Bowls, to the World Series and NASCAR races.

For more information, please contact Derek Rose (see contact details above).

ABOUT AERO Specialties: a one-stop GSE shop, AERO Specialties provides new and used aircraft ground support equipment to general and commercial aviation customers worldwide. AERO manufactures lavatory, potable water, cleaning, and oxygen/nitrogen servicing carts, as well as aircraft towbars. In addition to its own product line, AERO is an authorized distributors of other major GSE manufacturers, such as Eagle Tugs, TLD, Unitron, Jet Go, Tug Technologies, WASP, Clyde, Stinar, Wainbee and others. AERO also refurbishes all types of GSE, and maintains an extensive online store that provides customers with GSE and parts 24/7.
